Level-2 Data Flow Diagram

Level 2 DFD - Decomposition of 3.0 Custom Request, Images & Chat Handling

This is the most interactive part of the system, so it is decomposed more deeply than the other Level 1 processes.

Why Level 2 focuses on this branch

The custom-order path has the highest interaction cost and the greatest chance of miscommunication in the SRS, so it is decomposed further here. This keeps the model logical: the detailed sub-processes still roll back into the same Level 1 parent process 3.0.
